LOW TEMPERATURE & CRYOGENIC TANKS

EFFICIENCY AND SAFETY TO STORE LIQUEFIED GASES

Maraldi is able to ensure design experience and precision in the construction phase of single-or double-walled tanks for containing ammonia, oxygen, nitrogen, ethylene, ethane, propane and other hydrocarbons. The history of Maraldi with these types of tanks dates back from the year 1976, when the first ethylene tank (-104 °C) was supplied to Tecnimont for a petrochemical plant in Tomsk, Russia.
